Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5 and 17, are drawn to a process for manufacturing an element.

Group II, claim(s) 6-12, are drawn to a replication tool.

Group III, claim(s) 13-15, are drawn to a method for manufacturing a replication tool.

Group IV, claim(s) 16, is drawn to a method of equipping a master or a sub-master or a master tool for manufacturing a replication tool.

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature common to Groups I - IV is **the replication tool, having on a replication surface, negative structural features being a negative of at least some of the structural features, and further having a spacer portion protruding from the replication surface.** This cannot be a special technical feature under PCT Rule 13.2, because this technical feature is known in the prior art.

Sato, U.S. Patent No. 6,328,568 in figure 3B shows a mold comprising of a male mold (19) and a female mold (18). The female mold (as well as the male mold) shows both a negative recession, being a negative of at least some of the structural features, as well as a protrusion serving as a spacer portion.

Therefore, a holding that these three groups do not have a single inventive concept is proper.

3. A telephone call was made to David Spaw on September 8th, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to OMAR SIDDIQUE whose telephone number is (571)270-5515. The examiner can normally be reached on Monday-Friday 9AM-5AM.
